

# Congratulations

on your first pair of enhanced vision eyewear with Progressive lenses!

The lenses in your new eyewear are made with the latest digital technology which will provide you with the best visual experience at all distances.

As with any new lens, Progressive lenses will take some time to adjust to as the visual system has to learn how the lens works and some of your habits must change.

Have patience, it can take up to two weeks to be fully comfortable with your new lenses.

## **Tips to help you learn how to use your new lenses:**

- Wear your new eyewear as much as possible without switching back to your old glasses.
- Point your nose at what you are looking at to make things clear at all distances.
- Turn your head more than your eyes to make use of the lens most efficiently.
- Turn your head a little more when shoulder checking to move the soft focus area to the side.
- Move your computer closer or further away to create clearer vision during computer use.
  - Position the monitor so that the top edge is at eye level to avoid uncomfortable posture.
  - Tilt the screen up and increase the contrast on the screen for even easier viewing.

## **Cleaning your lenses correctly will ensure they last and you have scratch free vision.**

- Spray lenses or rinse them with cool water before wiping to avoid scratching.
- Use only approved lens cleaner – no Windex or other harsh cleaners.
- Use only a microfiber cloth to wipe lenses to trap dirt.

Thank you for trusting us with your vision.

We are so confident you will love your new eyewear that we provide our Vision Guarantee.

If you are not happy with your vision, just let us know and we will do whatever we can to ensure you have the best vision possible.

If you have any questions or concerns at any time, please call or come in and see one of our Eyewear Consultants who will be happy to help you through this learning process.

Enjoy your new eyewear!
